SUMMARY

Full-stack product engineer who designs, builds and ships web and mobile products end to end: interface, API, database and automated tests. Three years in accounts operations bring a practical understanding of the business workflows that software must support.

EXPERIENCE

Software Engineer, Product & Support — Zybra Accounting Software Nov 2025 – Present

- Rebuilt the company website in Next.js, matching the live site one to one.
- Added a release gate: every build must pass lint, unit tests, Playwright end-to-end tests and a production build.
- Diagnose and resolve customer issues in the company's accounting software.

Accounts and Office Operations Oct 2022 – Oct 2025

- Managed accounting, cashiering and bank reconciliation for high-volume stores across multiple companies.
- Maintained records on ERP and POS systems and trained new staff to use them.

PROJECTS

Phere — Wedding finance app · Web, Android, iOS May 2026 – Present

React, Supabase, PostgreSQL, Capacitor

- Designed, built and shipped solo; live in production with active users, now at v3.0.0.
- Unified wedding budgets, expenses, vendors, guests, RSVPs and e-invites in one secure workspace.
- Secured data with Supabase Auth, roles and row-level security; added OCR and AI through Edge Functions.
- Built an encrypted offline outbox that syncs changes safely on reconnect.

QaAgent-Pro — Open-source QA agent Jun 2026

TypeScript, Playwright, Node.js

- Tests a custom enterprise CRM the way a human QA engineer would, across 56 deterministic scenarios.
- Splits the work across five roles: planner, risk analyst, executor, defect verifier and release judge.
- Writes only to verified staging, then delivers a go or no-go Excel report with evidence.

Taazu — Operations CRM · Client project Sep 2026 – Present

TypeScript, React, Next.js, Supabase

- Built a custom CRM for a business owner running a drink-brand pilot in Ahmedabad.
- Brings live KPIs, supplier and buyer directories, budget tracking and a city map into one place.
- Added a spreadsheet importer with column matching, deduplication and undo.

Also built: BeforeCode (npm CLI for AI coding agents) · CanvaSync (real-time collaborative canvas) · CaseSheet (Smart India Hackathon project)

SKILLS

Languages: TypeScript, JavaScript, Go, Python, SQL

Frontend: React, Next.js, Vite, Tailwind CSS, shadcn/ui, Capacitor, PWA

Backend: Node.js, Supabase Edge Functions, REST, gRPC, Django

Data: PostgreSQL, Supabase, Prisma, Drizzle, row-level security

Testing and CI: Playwright, Vitest, axe accessibility testing, risk-based testing, GitHub Actions

AI tooling: Claude Code, Codex, agent workflows, OCR pipelines

Domain: Accounting, reconciliation, ERP, POS

Spoken: English, Hindi, Gujarati

EDUCATION

BCA (Bachelor of Computer Applications) — Monark University 2022 – 2026

Higher Secondary, Commerce — Om Shanti Higher Secondary 2022
